

Vehicle Wash

Nature's Toughest Cleaner

A Breakthrough in
"Green Cleaning Technology"

ENZYME SOLUTIONS
INCORPORATED

PRODUCT DESCRIPTION:

Vehicle Wash is a specially formulated blend of enzymes and surfactants to clean industrial and commercial vehicles

Vehicle Wash is a penetrating cleaner which removes dirt, grime, oil, bugs and grease from vehicle's surface.

Vehicle Wash is used by large commercial fleets in the United States and Canada

Vehicle Wash Dilution up to 1200:1

ADVANTAGES:

- **Powerful** cleaning formula
- **Biodegradable**
- **Deodorizes** static water tanks
- **Safe** for workers and environment
- With or without pressure washing system
- Contains no harsh chemicals
- Accelerates water reclamation

PRESSURE WASHING:

Apply solution with a pressure washer (at least 1000 psi). Dilution ratios up to 1200:1 are effective under high pressure. Enzyme formula will scrub on its own or agitate with wash mitt or brushes. Rinse vehicle thoroughly.

MANUAL WASHING:

This vehicle wash can be used without a pressure wash system. Simply add 1 ounce of solution for each gallon of warm water, apply solution with a sponge or brush. Rinse vehicle thoroughly.

RECOMMENDED USES:

- Commercial Truck Fleets
- Industrial Haulers
- Professional Car Washes
- Personal Vehicles

TECHNICAL DATA:

- pH neutral
- 100 % biodegradable
- Nonflammable
- Non-Caustic
- Dilution up to 1200:1

PACKAGING:

- 1 Gallon
- 5 Gallon Pails
- 55 Gallon Drums
- 275 Gallon Totes

MANUFACTURES DATA AND SAFETY REQUIREMENTS			
Specific Gravity	1.003	Safety Equipment and Clothing	None
Boiling Temperature	108 ⁰ C	Disposal Guidelines	Common Drains
Storage Temperature	10-70 ⁰ C	Flash Point	None
